These are Manual/Motorized Digital Hardness tester having High quality Color display with touch screen for easy hardness measurement.

The results are displayed in 0.1 Rockwell units for more accurate measurement.

Operation:

Various parameters of test can be set on setting screen on touch screen. Such as a High/low limits, dwell time, start, printer selection, scale selection etc.

All data can verify on pre load screen.

For **RASN-TSFA** : After pressing "CYCLE START" elevating screw will be raised till pre-load position followed by dwell time & Cycle complete with hardness indication in HIGH/OK/LOW. Elevating screw will lowered automatically to its previous position.

For **RASN-TS** : Place the specimen on table and lift the table till set point to reach. Once set point reached.

further operation like loading, dwell and unloading takes place automatically.

After hardness indication user can get a result print-out indicating date, time, hardness value, Scale. Result stored in HMI with Date, Time, Status which can be take any time on USB port in CSV formats.

FIE's new 'RASN-TS/TSFA' series of Hardness Testing Machines come with much improved design & look with following major design changes.

This insures productivity with better accuracy.
